PROFESSIONAL SUMMARY:

-
- 6 . 10 years of Overall Experience in Quality Assurance field providing Manual Testing, Build deployment in production, API Testing and Automation with selenium **WebDriver (Cucumber)** .
 - Extensive hands-on experience in QA on multiple Waterfall and Agile methodology and have played various delivery roles in projects like Test Analyst, Functional QA, Functional Agile tester & UAT Tester.
 - Having very good experience in using selenium concepts such as Action chain Class, Java Script Executor, Alerts, waits, Frames and multiple windows etc.
 - Automation Framework worked on: **Page Object Model, Page Factory Model, TestNG Framework and Data driven and Hybrid, and BDD Cucumber framework.**
 - Expertise in **API testing** using **Rest Assured Tool**
 - Reported, tracked and determined priority of the reported defects
 - Proficient in Automation and manual testing – Smoke testing, Functional testing, system integration (SIT) testing, Retesting, Regression testing, E2E testing, Data driven testing.
 - Well acquainted with all phases of SDLC and STLC.
 - Strong Experience in Automating Web Application Testing using Selenium WebDriver with TestNG framework
 - Strong Experience in Java Programming, OOPS Concepts, Selenium WebDriver.
 - Test cases using Element locators, WebDriver methods, Java programming features, Cucumber framework and TestNG Annotations
 - Executing Selenium Test Cases and Reporting defects.
 - Involvement in Test Estimations and Test strategy implementation.
 - Well versed in Test Planning, Test Case Script Design, Defect management
 - Have thorough knowledge of all phases of Testing Life Cycle from Requirement Analysis to Test Execution, Status Reporting and Defect Management.
 - Tracked bugs, Reported, and discussed about the bugs in the Defect triaging meeting.
 - Ability to handle multiple projects and Deliver Projects on Time.
 - Good written, communication, interpersonal skills, proven team player with an analytical mind bent to problem solving and delivering solutions.
 - Automated end-to-end regression and smoke test suites for web applications using **Playwright**.

TECHNICAL COMPETENCIES:

Testing Tools	Selenium Web Driver, Java23, BDD Cucumber, Hybrid Framework, TestNG Framework, GitHub, Postman, Swagger, CI/CD Jenkins, Javascript, Typescript, Playwright framework, Maven Build Management
IDE's	Eclipse, IntelliJ, VS code.
Test management tools	JIRA, HP ALM, BDD Cucumber studio
Relational DBMS Tools	MYSQL, ORACLE

ACADEMIC QUALIFICATIONS:

- BTECH in E.C.E from BVC Engineering college (JNTUK) with an aggregate of 65.8% (2018 Passed out).

AWARDS & APPRECIATION:

- **Certified QA Engineer @Backbase India Pvt. Ltd.**
- Received Client appreciation for understanding the application very soon being a trainee
- Received appreciations for active participation in all Management level activities.

PROFESSIONAL EXPERIENCE:

- Worked as **QA Engineer in Backbase Pvt. Ltd. (Certified)** Hyderabad from Aug 2025 to March 2026.
- Worked as a Sr. Software Test engineer in Vectramind Technologies Pvt. Ltd. Hyderabad from July 2019 to Aug 2025.

PROJECT SUMMARY:

Project 1:

Client : **Hunter Health Insurance (HHI)**
Manual & Automation Tool : Selenium Web Driver with Java, BDD Cucumber Framework, Jira, GIT Hub, Eclipse, Rest assured.
Team Size : 8
Role : Sr. Software Test Engineer

PROJECT DESCRIPTION (JUL 2019-OCT 2023) :

Hunter Health Insurance (HHI) is a not-for-profit, member-owned private health insurer based in Cessnock, New South Wales, Australia. Established in 1952 as the Cessnock District Health Benefits Fund, HHI has been serving the community for over 70 years, providing affordable and comprehensive health coverage to Australians.

ROLES & RESPONSIBILITIES:

- Understanding the Requirements and Functional Specifications of the application.
- Involved In BDD Cucumber Framework Creation
- Responsible for writing the acceptance criteria in a feature file using gherkin language
- Frequent status check with the Team Lead to ensure timely delivery of different milestones.
- Reporting Automation defects in Jira and doing defect follow-ups with development team
- Analyse the changes in the new build and update it accordingly.
- Developed and executed Automation Test scripts for Policy Module
- Code check-in and check-out by using GIT.
- Performed Smoke, Sanity and Regression suites execution for every sprint release
- Uploading all testing documents in SharePoint as per release specific folders
- Developed features files, scenario and scenario outlines for Policy module
- Involved in writing of functional Test case design and execution for new user stories
- Report the Bugs.
- Performed API testing and used Selenium, Java, and Rest Assured for automation.

Project 2 (OCT 2023- APR 2024):

Client	:	MediaMarkt
Manual & Automation Tool	:	Selenium Web Driver with Java BDD Cucumber Framework, Jira, GIT Hub, Eclipse,SQL.
Team Size	:	6
Role	:	Software QA Engineer

PROJECT DESCRIPTION:

MediaMarkt is one of the largest online electronic stores in Germany's ecommerce market. It is owned by MediaMarktSaturn Retail Group and was founded back in 1979. It had humble beginnings as a brick-and-mortar store in Munich, but today it sells in 11 countries, including Poland, Spain and Turkiye. The company markets products under its own brands, including PEAQ (electronics), KOENIC (home appliances), ISY (accessories), and ok. (budget-friendly electronics).

ROLES & RESPONSIBILITIES:

- Designed, Implemented and maintained test scripts for testing web-based user interface.
- Create .feature files using business-readable language.
- Analyze test results and log defects for failed scenarios.
- Involved in functional specification documents to develop test cases and test scenarios.
- Wrote test cases in Web Driver to switch between multiple windows.
- Involved in preparing bug status reports and Preparing test status reports.
- Perform regression testing after bug fixation and modification.
- Coordinated smooth implementation of test plans with the development team.
- Performed Back end testing using SQL queries to access the main database.
- Active participation in reviews and status meetings.
- Prepared the Status Reports like Daily and Weekly.
- Written and executed test cases using Selenium Web Driver.
- Performed API testing and used Selenium, Java, and Rest Assured for automation.
- Working in an agile environment and delivering the User Story in a very short period
- Code check-in and check-out by using GIT.
- I interacted with clients on regular basics and presented demo's on completed user stories.

Project 3 (APR 2024 - AUG 2025):

Client	:	Zurich Financial Services.
Manual & Automation Tool	:	Selenium Web Driver with Java BDD Cucumber Framework, Jira, GIT Hub, Eclipse, SQL.
Team Size	:	6
Role	:	Software QA Engineer

PROJECT DESCRIPTION:

Zurich Financial Services Australia Limited is the local arm of the Zurich Insurance Group Ltd, a global insurance and financial services company. In Australia, we operate under two brands across the following lines of business - general insurance, life insurance, and savings and investments products

ROLES & RESPONSIBILITIES:

- Involved in writing of functional Test cases and Test execution for new user stories
- Report the Bugs in HP ALM.
- Performed Smoke, Sanity and Regression suites execution for every sprint release
- Defect follow-ups with development team until it comes for closure
- Performed API testing and used Selenium, Java, and Rest Assured for automation.
- Analyze the changes in the new build and update it accordingly.
- Frequent status check with the Team Lead to ensure timely delivery of different milestones.
- Developed and executed Automation Test scripts for Policy, Billing and claims module
- Uploading all testing documents in SharePoint as per release specific folders
- Developed features files, scenario and scenario outlines for Policy and claims module

Project 4 (OCT 2025 - MAR 2026):

Client : BDO Philippines bank.

Manual & Automation Tool : Typescript, Javascript, Playwright framework, Jira, GIT Hub, Vscode.

Team Size : 6

Role : QA Engineer

Project Description:

Experienced in navigating the Philippines' largest retail banking landscape, which integrates an extensive network of over 1,500 branches with cutting-edge digital platforms like BDO Online and BDO Pay. My background includes managing diverse financial products—ranging from credit cards and mortgages to micro-loans through BDO Network Bank—while prioritizing security via biometric authentication and real-time card controls.

- Analyzed business requirements and created detailed test cases covering functional, regression, and edge scenarios.
- Automated end-to-end test cases using Playwright (TypeScript/JavaScript) for critical business workflows.
- Developed reusable Page Object Model (POM) structure to improve maintainability and scalability.
- Automated cross-browser testing (Chromium, Firefox, WebKit) to ensure consistent application behavior.
- Integrated automated test suite with CI/CD pipeline for scheduled and build-triggered execution.
- Reduced manual regression effort by automating 80% of high-priority test scenarios.
- Generated detailed HTML reports for test execution results and defect tracking.
- Collaborated with developers and product team to clarify requirements and close defects efficiently.
